

## Single FreeWheel Manual (28t.30t.32t.34t.36t)

---

- Insert the gearoop FreeWheel into the Cassette body.
- Try to rotate it to judge whether you need to put spacer2 into the Cassette body first. If so, put spacer2 before the gearoop FreeWheel. If not, ignore the spacer2 and go to next step.
- Take the 11t away, and insert the original FreeWheel into the Cassette body.
- Put the spacer1 on.
- Tighten the FreeWheel Cover.
- Done.

<Note1> please consider the teeth of gearoop and original FrreWheel. Not suggest over 3 teeth difference.

<Note2> You might need to change Derailleur Cage or Chains to fit FreeWheel.

<Note3> Must test before cycling.
